MORE ABOUT US

www.sinarmetrindo.co.id

PT Sinar Metrindo Perkasa (Simetri) was founded in 1986 with the purpose of manufacturing high quality switchboards which conform with regulation and safety standard of government agencies or other organizations. Simetri manufactures high quality products which not only do give the highest efficiency and effectiveness in power distribution, but also give maximum safety.

Simetri has the meaning of balance or stability. Simetri in Indonesian language stands for 'sinar', 'metal', and 'listrik' which are the three cores of our business. Simetri logo takes the form of a circle which symbolizes the natural cycle of life. The cycle means that we work continuously for the better future of people and environment.

We work dilligently to gain the trust of customers by following our principles such as perseverance, commitment, fairness, accountability, and integrity. Guided by vision, mission, and philosophy from the founder, Simetri strives to be the best by providing quality products and satisfying services with reasonable price. Simetri also contributes to the development of people and environment.

WARRANTY

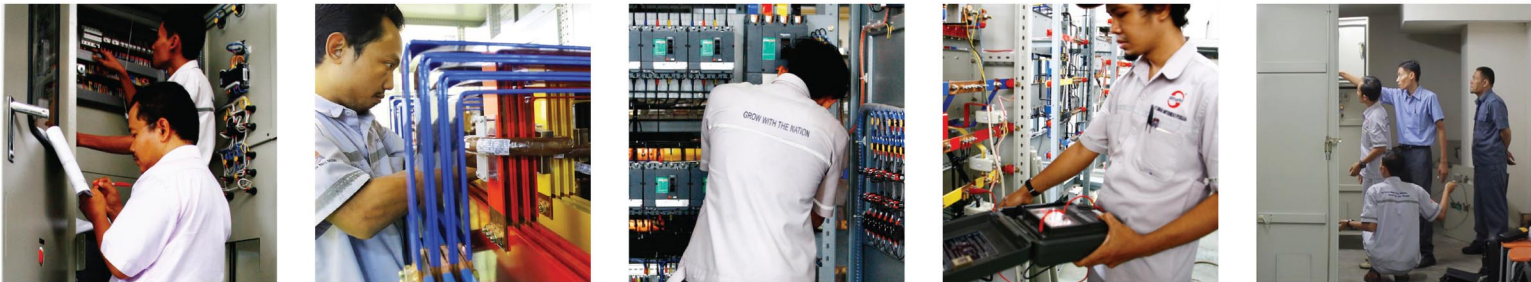

Sinar Metrindo Perkasa guarantees the highest quality by conforming with standard and regulation of authorized organization.

We provide consultation for electrical switchboard work system and design to customers. Simetri commits to deliver on time. Our after sales service staffs are always ready to serve you.

PRODUCTS & SERVICES

Simetri is able to manufacture electrical switchboard that has segregation level up to form 4B. It also manages to do complex duties using PLC (Programmable Logic Control), and comply with the IEC 60439-1 rules.

Our Electrical Switchboard Designs

Wall Mounting Type

- Indoor and outdoor type
- The steel plate has 1.5 mm thickness
- The busbar is 99.9% pure copper
- Powder coating paint with standard colors: light grey or dark grey
- The size can be customized
- Maximum ampere rating 250 A

Free Standing Type

- Indoor and outdoor type
- The steel plate has 2.0 mm thickness
- The busbar is 99.9% pure copper
- Powder coating paint with standard colors: light grey or dark grey
- The size can be customized
- Maximum ampere rating 6,300 A
- Equipped with duct and drawing rack

Genset Control Switchboard

Controlling the starting up and shutting down of a generator set, synchronizing between generator sets, and controlling back and forward synchronization between generator set and electric power from PLN.

LVMDP Switchboard

Protecting and distributing electric power to sub panel or loads. Equipped with ATS (Automatic Transfer Switch).

Capacitor Switchboard

Correcting the power factor so that the energy cost can be reduced.

Distribution Switchboard

Controlling and protecting the distribution of power to sub panels and loads such as hydrant, lighting, lift, etc.

Pump Switchboard

Controlling the operational of water pump. We have experiences in manufacturing all types of pump controller which can be equipped with star-delta, DOL starter, and reverse starter.
